

Standard Plastic Disabled Toilet

Our standard disabled toilet is built with the same high quality and strength as our smaller single chemical units but with much larger dimensions and an easy access entrance. Each unit contains sturdy handrails and a door width suitable for wheelchair access and contains baby changing facilities. The external base measures 1.55m x 1.55m and allows generous wheelchair turning space and can accommodate an additional adult where appropriate.

Features

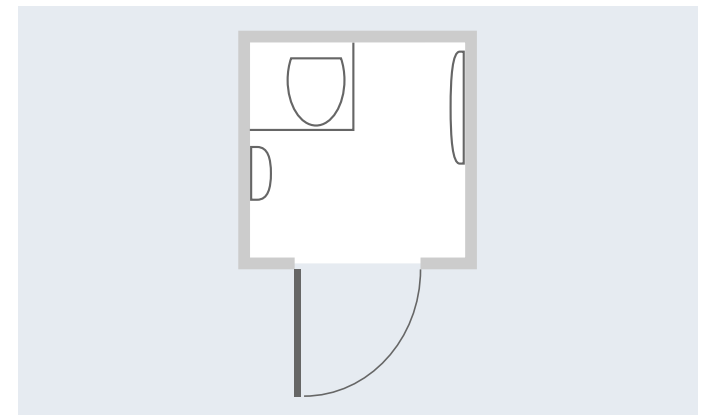

- Full width hand rails on two walls
- Ground level wheelchair access
- Easy locking rotary door latch indicator system
- Toilet rolls and alcohol based sanitiser
- Completely self-contained
- Equip with a baby changer
- Does not require mains water or power
- Ventilation grills and translucent roof for natural light

Access Requirements

Flat level firm ground with good access for 4x4
